# Vietplywood

VIETPLYWOOD specializes in the manufacturing and supply of peeled plywood, veneer plywood, interior plywood, and film-faced plywood for both domestic and international B2B customers. With over 7 years of operation and an established export network to Malaysia, Thailand, Singapore, South Korea, Japan, and India, the company currently serves more than 20 long-term corporate clients, positioning itself as one of the reputable plywood suppliers in Northern Vietnam.

Our factory is located in Thanh Son, Phu Tho Province—the center of the acacia and eucalyptus raw material region—enabling us to maintain competitive pricing, fast delivery, and consistent product quality.

## INTRODUCTION

The company is committed to providing stable-quality products, sustainable supply, reasonable pricing, and prompt support. For new customers, we are ready to offer professional consultation, free samples, and comprehensive product information to ensure a transparent and smooth cooperation process.

# VISION

To become a leading standard-compliant plywood supplier in Asia, expanding globally and being the preferred choice of domestic and international enterprises through consistent product quality, outstanding delivery capability, and a long-term commitment to cost optimization for our customers.

We aim to build a Vietnamese brand capable of competing in the global market, contributing to the advancement of Vietnam's wood industry through **sustainable, transparent, and internationally compliant products.**

# MISSION

- To provide plywood products with **consistent quality that meet the technical standards** of each market, while supporting B2B customers in maintaining an efficient and sustainable supply chain.
- To continuously standardize processes, optimize costs, and enhance manufacturing capabilities in order to **strengthen the global competitiveness** of Vietnam's plywood industry.

# CORE VALUE

## **1. Standardized Quality – Quality Consistency**

We regard quality consistency as the foundation of our operations. Raw materials and production processes are strictly controlled to ensure that every plywood panel meets stable performance, durability, and the technical standards required by each target market.

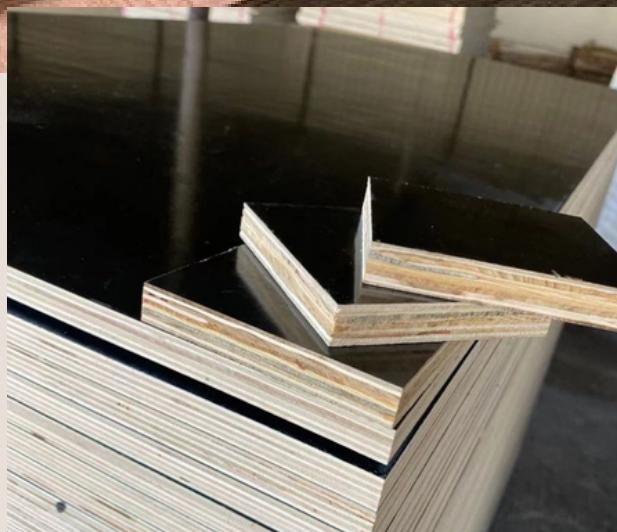

## **2. Commitment & Accountability – Customer-Centric & Reliability**

With a customer-centric approach, we prioritize our clients' needs and deliver transparent, on-time service. Reliability in every shipment enables our customers to operate with confidence while optimizing costs across their supply chains.

## **3. Proactiveness & Sustainability**

We maintain a proactive approach to production and supply, leveraging our raw material advantages and standardized processes to ensure continuity. At the same time, we are committed to sustainability through responsible sourcing and continuous improvement of our manufacturing capabilities.

# PRODUCTS

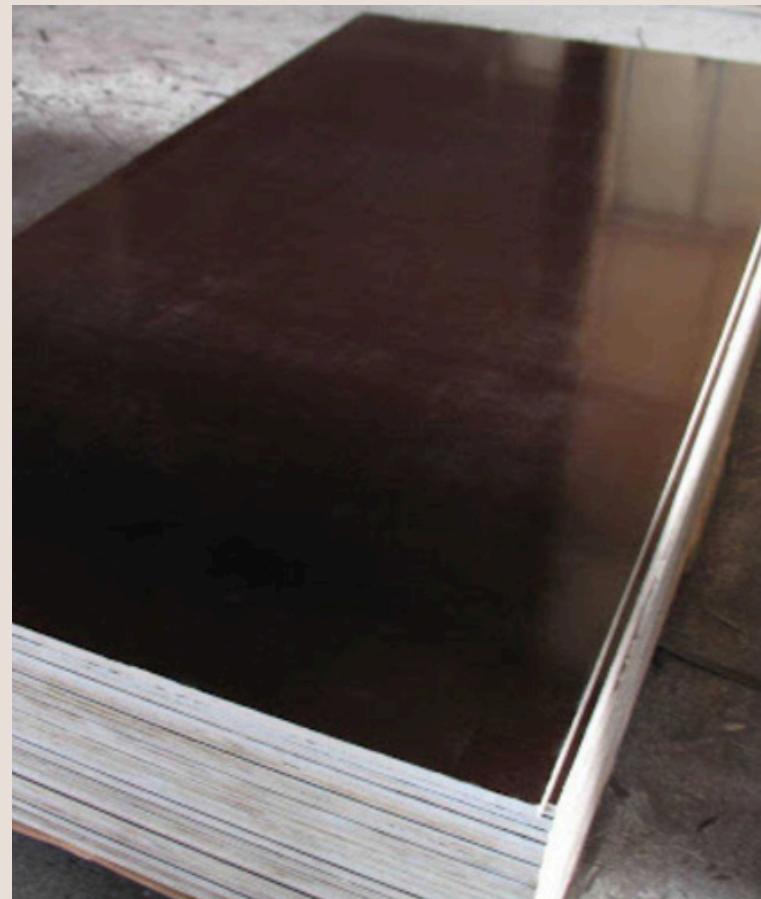

We focus on manufacturing acacia-based plywood with customizable thickness and moisture content. In addition, the company supplies film-faced plywood and interior plywood with a variety of surface options, including Bintangor, Okoume, Ash veneer, white-faced panels, along with customized processing services (OEM/ODM).

# FILM FACED PLYWOOD

Size	<ul style="list-style-type: none"><li>• 1220 x 2440mm</li></ul>
Thickness	<ul style="list-style-type: none"><li>• 12mm - 7 layers</li><li>• 14mm - 9 layers</li><li>• 15mm - 9 layers</li><li>• 18mm - 11 layers</li><li>• Customize</li></ul>
Glue	<ul style="list-style-type: none"><li>• 10% Min Glue</li></ul>
Grade	<ul style="list-style-type: none"><li>• AA/ AB/ BB</li></ul>
Tolerance	<ul style="list-style-type: none"><li>• 0.5mm</li></ul>

Film Faced Plywood is one of the most widely used plywood types in the construction industry due to its excellent water resistance, smooth surface, high durability, and multiple reusability. It is a key material in concrete formwork systems, helping to optimize costs while ensuring high-quality surface finishes for construction projects.

# BINTANGOR FACED PLYWOOD

Size	<ul style="list-style-type: none"><li>• 1220 x 2440mm</li></ul>
Thickness	<ul style="list-style-type: none"><li>• 3mm - 3 layers</li><li>• 5mm - 3 layers</li><li>• 8mm - 5 layers</li><li>• 11mm - 7 layers</li><li>• 13mm - 8 layers</li><li>• 15mm - 9 layers</li><li>• 17mm - 11 layers</li><li>• 20mm - 13 layers</li><li>• Customize</li></ul>
Glue	<ul style="list-style-type: none"><li>• E2</li></ul>
Grade	<ul style="list-style-type: none"><li>• AA/ AB/ BB</li></ul>
Tolerance	<ul style="list-style-type: none"><li>• 0.5mm</li></ul>

Bintangor-faced plywood has long been a preferred choice for furniture workshops, packaging factories, and wood product manufacturers. With its competitive pricing, consistent color, and easy-to-process surface, this plywood line offers a well-balanced combination of cost efficiency, aesthetics, and durability, making it particularly suitable for high-volume markets with optimized price requirements.

# OKOUUME FACED PLYWOOD

Okoume veneer features a light pink to bright reddish tone, with a smooth surface and uniform grain. As a highly aesthetic veneer with minimal defects, it helps reduce sanding time during production. Okoume plywood is consistently valued for its visual appeal and uniform quality. Thanks to its lightweight properties, it reduces structural load in interior applications and lowers transportation costs. The surface also offers excellent paint adhesion, making it ideal for products that require bright colors or refined finishes.

If you are looking for plywood with a bright, smooth surface that is easy to paint, offering consistent quality and a more premium feel compared to standard veneer options, Okoume-faced plywood is an ideal choice. This product is widely favored in markets such as Japan, South Korea, Malaysia, and Singapore due to its uniform aesthetic quality and lightweight characteristics.

Size	<ul style="list-style-type: none"><li>• 1220 x 2440mm</li></ul>
Thickness	<ul style="list-style-type: none"><li>• 3mm - 3 layers</li><li>• 5mm - 3 layers</li><li>• 8mm - 5 layers</li><li>• 11mm - 7 layers</li><li>• 13mm - 8 layers</li><li>• 15mm - 9 layers</li><li>• 17mm - 10 layers</li><li>• 20mm - 11 layers</li><li>• Customize</li></ul>
Glue	<ul style="list-style-type: none"><li>• E2</li></ul>
Grade	<ul style="list-style-type: none"><li>• AA/ AB/ BB</li></ul>
Tolerance	<ul style="list-style-type: none"><li>• 0.5mm</li></ul>

# WHITE FACED PLYWOOD

White faced plywood is a bright, clean, and modern material, making it an ideal choice for office interiors, retail spaces, and projects that embrace a minimalist design aesthetic.

Size	<ul style="list-style-type: none"><li>• 1220 x 2440mm</li></ul>
Thickness	<ul style="list-style-type: none"><li>• 2mm - 3 layers</li><li>• 3mm - 3 layers</li><li>• Customize</li></ul>
Glue	<ul style="list-style-type: none"><li>• E2</li></ul>
Tolerance	<ul style="list-style-type: none"><li>• 0.5mm</li></ul>

White-faced plywood offers significant advantages: a modern, clean appearance and high versatility across a wide range of design styles. Its durable color resists yellowing over time, unlike natural veneer. In addition, the white surface enhances brightness, creating a more open and spacious feel.

# BINTANGOR VENEER PLYWOOD

Bintagor veneer plywood offers a natural aesthetic with warm wood tones and smooth grain patterns, making it ideal for residential interiors, showrooms, and products that demand high visual appeal. Bintagorveneer delivers a refined yet inviting look—one of the key reasons this plywood range is highly favored by architects and designers.

# WHY CHOOSE US

## 2. Stable Supply & On-time Delivery

With our factory located in Phu Tho—one of Vietnam's key raw material regions—we maintain full control over production capacity, enabling reliable supply and on-time delivery for B2B clients and large-scale projects.

## 1. Quality Consistency

Each plywood panel is manufactured under standardized processes with strict quality control, ensuring durability, structural stability, and compliance with technical standards across multiple international markets.

## 3. Cost Efficiency

Our proximity to raw material sources, combined with extensive manufacturing experience, allows us to offer competitive pricing and cost-optimized solutions while minimizing supply chain risks.
